Buildots
Connected Construction

A lack of visibility on construction projects can seriously jeopardise the schedule, budget and even the project itself. Construction leaders need visibility to be able to make informed decisions that support their teams and mitigate risks related to delays, overpayments, and deviations from the design. But today, they have to base their decisions on subjective and incomplete data. They receive reports from people who have received reports.

As a result, there's a disconnect between decision-making and the reality on-site.

More Control, Less Effort

Progress Tracking

Subcontractor Performance Analysis

Payment Claims Validation

Early Warnings for Delays & Deviations from Design

Buildots remove these barriers, connecting the disconnected.

Buildots' AI-based technology analyzes the captured data and compares it with the design and the plans. With a dashboard and custom reports allowing you to view the data at the project, division, region and company level, each piece of information is supported by visuals that can be pulled at any moment to back up any decision.

Benefits

Forecast more accurately

Know early on which of your projects require more resources and which are not progressing as expected.

Protect your reputation

Ensure you always deliver to company standards by getting full transparency on project progress.

Meet critical deadlines

Gear your business up to avoid delays to the critical path.

Better cash flow management

Maintain a positive cashflow - Bill and pay based on actual progress.

Ensure as-builts are as built

Have total confidence that what has been designed is what is being built.
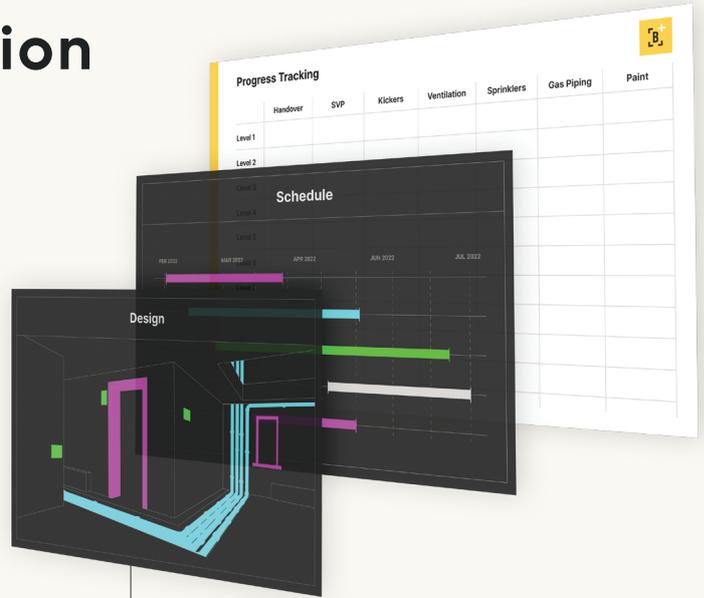

Industry innovator recognition

Innovation has already started to emerge on construction sites across the world.

CONNECTING PLANS
We Know Your Process

You have designs. You have a schedule. That's all we need from you. We combine your design and schedule in our 4D Modeling Engine and you get one detailed Execution Plan. No matter how complicated, one plan now rules them all.

CONNECTING REALITY
You See Your Progress

We provide you with a 360° Go-Pro camera. All you need to do is click 'Start' and walk around the jobsite. Once done connect the camera to the computer and let the data do its thing.

CONNECTING STAKEHOLDERS
We Put the Data to Use

Lots of data means lots of graphs and tables and charts. And potentially lots of confusion. That's where Buildots helps turn chaos into clarity. Delivering the right data, in the right way, to the right people. All on your behalf.
